1st

Phylogenetic tree of the 3rd domain of the 16S rRNA gene. The tree shows the relationships between various bacterial strains, with bootstrap values indicated at the nodes. The strains are labeled with their names and accession numbers. The tree is rooted on the left and branches to the right. The 3rd domain clade is the most prominent, with a bootstrap value of 314 at the base. Other clades include the 1st domain (bootstrap 259) and the 2nd domain (bootstrap 260).

The diagram shows a floor plan for the 5th floor. It consists of two horizontal rectangular sections, L301 (top) and L302 (bottom). A shaded rectangular area is located within the L301 section, labeled with the number 330. The entire floor plan is labeled 5th on the right side.
